

Siva Naga Sai Jammula is currently pursuing the Master of Science (M.S.) degree in Electrical and Computer Engineering at Worcester Polytechnic Institute (WPI), Worcester, Massachusetts, USA. He earned the Diploma degree in Electrical and Electronics Engineering from A.A.N.M. & V.V.R.S.R. Polytechnic College, India, in 2021, followed by the Bachelor of Technology (B.Tech.) degree in Electrical and Electronics Engineering from Bharath University, India, in 2024.

He is currently working as a Graduate Teaching Assistant and Graduate Tutor at Worcester Polytechnic Institute, where he supports undergraduate and graduate courses while assisting students in developing strong analytical and problem-solving skills in electrical engineering.

His research interests include power systems, smart grid technologies, renewable energy integration, digital signal processing, signal processing, machine learning and deep learning applications in electrical engineering, intelligent control systems, power system monitoring, and data-driven techniques for improving the reliability, stability, and efficiency of modern electrical power networks. His current research focuses on applying advanced artificial intelligence techniques to address emerging challenges in smart grids and sustainable energy systems.

He can be contacted at **sivajammulaa@gmail.com**.
